Explore Sustainable Travel

Everyone needs to travel either to school, college or university, to work, for appointments and to socialise.

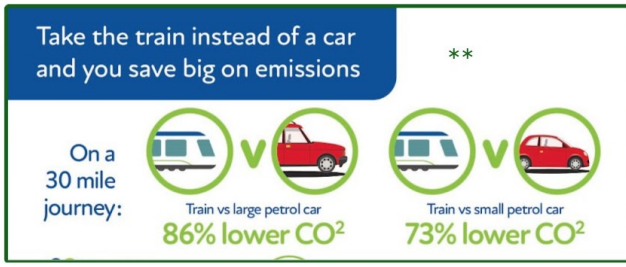
Have you considered your impact on our environment and what changes you can make? Could you

- Use the train instead of the car?
- Use public transport more?
- Walk more?
- Cycle more?
- Car share rather than travelling alone?

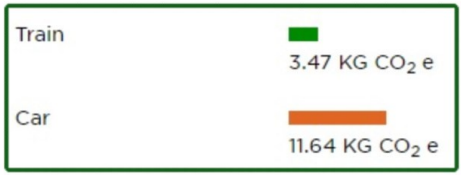
What will you do?

Do you know transport is the largest emitting sector of greenhouse gases in the UK?

27% of domestic emissions in 2019. Rail accounts for just 1% of this amount. *



Consider a journey from Wetheral to Newcastle



Use a carbon footrint calculator to see how much you can help the environment by using the train https://tinyurl.com/pm348nt7 ***

What will you do?
